Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a method of decoding coded digital picture data. The independent claims identify the feature of "storing in addition compressed picture data of a previous GOP; retrieving compressed picture data from the previous GOP in a forward reproduction order; producing decoded pictures of the previous GOP by picture predictions according to a decoding method of the MPEG standard; temporarily storing the produced decoded pictures of the previous GOP in order of limit retrieval of compressed picture data of the previous GOP to once-only. The closest prior art, Kawamura et al discloses a conventional video reproducing apparatus, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
